
Android Coding Challenge

1 SUMMARY

Create an Android app that displays photos returned by the Flickr search API.

2 FUNCTIONAL REQUIREMENTS

1. Provide a search field for user input
2. Display 20 results for the given search terms, including the image and the title.
3. Load more results as the user scrolls. Infinite scroll.
4. Allow the user to click on photos to go into a new activity, that displays the image full screen.

3 TECHNICAL REQUIREMENTS

1. Make all calls to the Flickr REST API.
2. Consume all API content using JSON.
3. Use of third party libraries is okay.

4 RESOURCES

1. Flickr API Docs: <https://www.flickr.com/services/api/>
2. API key to use: 3a727909787cc320f383326b499b367e
